

## Birds of a Feather

### Block Lotto

The attached written instructions for the Bird Block may seem a wee bit confusing at first, but just use the directions for cutting out the pieces as it's written. Then follow the referenced video tutorial done by Jenny Doan of Missouri Star as she makes the assembly of the bird really simple and quick. Just click on the attached link to get to the video tutorial.

I have changed the sizes just a little in the cutting instructions, as I found the completed block a tad smaller than it should be. The bigger cuts will make it much easier.

Note: When doing the final trim, please be sure to leave at least a quarter inch behind the bird's tail for seam allowance, otherwise he/she will have a squared off tail.

Happy stitching!!
